Document 1 describes integrated molding of a painting sheet, and describes that burr-preventing grooves are formed around the whole or parts of the circumference of a cavity. A part of molding resin is discharged into the burr-preventing grooves described in document 1 from the cavity (a product-molding space), so the grooves correspond to a molding space for discharging resin.

Document 2 also describes integrated molding of a painting sheet, and describes that burr-preventing grooves are formed around the whole or parts of the circumference of a cavity.
